

Application for MPS Matter to Life - Undergraduate Research Opportunities

Applicant: Rohit Kokane

Reference number: 256820

Instructions

Personal Information

Personal Details

Gender	male
Surname/family name	Kokane
First/given name	Rohit
Middle name(s)	Ramdas
Date of birth	10.02.2007
Country of birth	India
Nationality or Citizenship	India

Contact Information

Street address (street name and number)	Ganeshwadi, Govindnagar Airport road shirdi
City	Shirdi
State	Maharashtra
ZIP code	423 109
Country	India
Phone Number	8999338920
Email address	kokanerohit07@gmail.com

Education

Higher Education (e.g. University)

Degree type	Btech
Degree Subject/Major	Computer Science and Engineering

Grade Point Average (GPA) or Grade	3.16
Grade Scale - from (worst)	0.0
Grade Scale - to (best)	4.0
Name of University/Institution	Sanjivani University
Type of Institution	University
Country of University/Insitution	India
Was the program taught in English?	Yes
Start/end date of current degree	01.08.2025

Further higher education (additional B.Sc. or M.Sc.) (optional)

Internship Details

First name	Sarah
Last name	Loos
Time frame	I am flexible
From - To	01.06.2027

Upload Documents*

Curriculum Vitae (CV)	File attached
Academic transcript	File attached
Personal Statement	File attached

Additional Information

Statistics

How did you become aware of us?	Personal Recommendation (e.g. friend, colleague, professor etc.)
Which other research institutions/universities have you applied to?	NA
Which other research institutions/universities are you planning to apply to?	Discover Emirates Group Internship Programme

Submission Disclaimer*

Submission confirmation 1

I confirm that all information given in my electronic application is complete and correct. I confirm that all documents submitted electronically are identical to the originals.

Submission confirmation 2

I am aware that false information, given intentionally or unintentionally, will result in my exclusion from the admission procedure or - if detected at a later time point - from the membership of the program.

Submission confirmation 3

I agree to the storage and processing of my personal data for application and admission purposes in line with the European General Data Protection Regulations (GDPR). I agree to the confidential distribution of my personal data to individuals that are involved in the admission procedures.
Please note that your application data will be deleted from our server as soon as possible after the completion of the selection process.

Submission confirmation 4

I declare that I am fluent in written and spoken English to fully understand the above written statements.

I agree to let my data and CV be stored and passed on to third parties for the possibility of obtaining a PhD position outside of the Max Planck Schools

I agree

EDUCATION

Sanjivani University

Bachelor of Technology in Computer Science and Engineering

2026 – Pursuing
Maharashtra

- CGPA: 7.93

Sanjivani K.B.P. Polytechnic

Diploma in Computer Technology

Jul. 2022 – Jun. 2025
Maharashtra

- Percentage: 87.20%

EXPERIENCE

Ethara AI

LLM Intern (Paid Internship)

Feb. 2026 – May 2026
Remote

- Worked on Large Language Models (LLMs) and Generative AI applications.
- Designed and tested prompts to improve response quality and model performance.
- Assisted in model evaluation, dataset preparation, and workflow optimization.
- Collaborated with the AI development team on real-world AI use cases.
- Received a stipend of **30,000 per month**.

Thought Bliss Solutions

Software Development Intern

Jul. 2024
Pune, India

- Developed an Employee Management System (EMS) to manage employee records and payroll data.
- Designed database structures and implemented CRUD functionalities.
- Worked with Java, HTML, CSS and MySQL during development.
- Collaborated with senior developers during testing and deployment.

Cognifyz Technologies

Data Analytics Intern

2024
Remote

- Analyzed and cleaned datasets using Python and Excel.
- Created dashboards and reports using Power BI and Tableau.
- Used SQL for data extraction and analysis.
- Performed Exploratory Data Analysis (EDA) and presented insights.

PROJECTS

Food Waste Reduction Application

- Built a web platform connecting food donors with NGOs and beneficiaries.
- Implemented donation tracking and food request management features.
- Designed and managed MySQL database for efficient record handling.
- Technologies: Java, HTML, CSS, MySQL

Stock Price Prediction System

- Developed a machine learning model to predict stock prices using historical market data.
- Performed data preprocessing, visualization and model evaluation.

- Used Python, Pandas, NumPy and Matplotlib for analysis.

E-Commerce Website for Custom Glass Fabrication

- Developed a responsive e-commerce platform for custom glass products.
- Implemented product catalog, customer interaction and order management modules.
- Technologies: React.js, Node.js, Express.js, MongoDB

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++, JavaScript

Web Technologies: HTML, CSS, React.js, Node.js, Express.js

Databases: MySQL, MongoDB, Firebase

AI & Data Analytics: LLMs, Prompt Engineering, SQL, Power BI, Tableau

Tools: Git, GitHub, Linux, VS Code

Cloud: AWS

Cumulative Result Status : PASS

PERSONAL STATEMENT

I am Rohit Ramdas Kokane, a Computer Science undergraduate at Sanjivani University with a strong interest in Artificial Intelligence, Machine Learning, and Large Language Models (LLMs). I am motivated by the opportunity to apply my academic knowledge to real-world research and to learn from researchers working on challenging problems in modern AI. The MTL Fellowship represents an opportunity for me to strengthen my research skills, explore new ideas, and contribute meaningfully to a laboratory working in an area aligned with my interests.

During my studies, I have developed a foundation in programming, data structures and algorithms, databases, operating systems, computer networks, and artificial intelligence. I have also gained practical experience through projects and internships. In particular, during my internship as an LLM Intern at Ethara AI from February to May 2026, I worked with LLM-related tasks and gained exposure to model training and evaluation workflows. This experience increased my interest in understanding how AI systems learn, perform, and can be improved through systematic experimentation.

I am particularly interested in research that connects machine learning with practical applications and intelligent systems. I want to develop a deeper understanding of how modern language models are trained, evaluated, and adapted for different tasks. I believe that working in a research laboratory would help me move beyond implementation alone and develop the ability to formulate research questions, analyze results, read scientific literature, and communicate technical findings clearly.

I would bring curiosity, consistency, a willingness to learn, and hands-on programming experience to the fellowship. I am comfortable learning new technologies independently and working through unfamiliar technical problems. At the same time, I understand that research requires patience, critical thinking, careful experimentation, and openness to feedback. I am eager to learn from the members of my preferred MTL Fellow laboratory and contribute wherever my skills can be useful.

My long-term goal is to build a career in AI and machine learning, with a particular interest in LLMs and intelligent software systems. I see the MTL Fellowship as an important opportunity to gain research exposure, work in an academically rigorous environment, and understand how impactful AI research is conducted. I would be grateful for the opportunity to contribute to the laboratory, learn from its researchers, and use the experience to develop into a stronger AI researcher and engineer.
